

Course Name: Pollution Prevention

Course Description: The objective of this course is to demonstrate, using real-life examples, how facilities can profit/benefit from taking a pro-active and cost-effective approach in dealing with industrial pollution by implementing pollution prevention (P2) measures. Benefits of pollution prevention include:

- Improved safety
- Increased efficiency
- Decreased cost of production/operation
- Reduction in raw materials/waste
- Decreased cost of compliance
- Minimized clean-up costs
- Minimizes/avoids the creation of pollutants
- Increased environmental performance
- Reduce risk of fines

Target Audience: This course is designed for regulatory compliance officers, environmental and safety managers, operations employees, production and maintenance personnel and others who play a role in environmental and operation management in their organizations.

Course Outline: This course addresses the following topics:

- Basic concepts of pollution prevention (P2);
- Why P2 is related to process engineering;
- How P2 can reduce your total costs in the areas of operating costs, image and relationship costs and contingent costs;
- What should be covered in a P2 plan and how it is implemented;
- Where to find financial supports for P2; and
- Who can provide assistance in developing and implementing a P2 plan.

Length of the Course: This is a one day course.

Course Location: JW office or client offices.

Course Evaluation and Certification: A Jacques Whitford Training Institute certificate will be provided to participants.

Course Pre-requisites: None

Materials: All course materials will be provided by the instructor.

Supplementary reading(s): None

Jacques Whitford Training Institute

Instructor Information: To be determined.

Available Support Services: If you have any questions, please contact course_admin@jacqueswhitford.com or call Course Admin at JWTI (613) 738-0708 ext. 3204.
